Project Experience:

Class Projects

MERN Stack Single-Page Application

- Created a MERN Stack Single-Page Application to create a dating simulator game using React for the front end, GraphQL with a node.js and Express.js Server also using Mongoose ODM for the database.The app allows the user to play a fun and interactive game that puts them in their first day of class in the UW full-stack web Debelopment bootcamp. (available for live demo on my portfolio).

Interactive Full-Stack Application

- Created a real-World full-stack Application for a travel website allowing users to view and save some of the top resorts, theme parks, water parks,etc. Used Node.js and Express.js to create the Restful API, Handlebars.js as the template engine and MySQL and Sequelize ORM for the database(available for demo on my portfolio).

MERN: Book Search Engine

- Refracted a Google Books API search Engine built with a RESTful API, to a GraphQL API built with Apollo Server. The app was built using the MERN stack with a REACT front end, MongoDB database, and Node.js/Express.js server and API. It allows the user to search for new books so that they can keep a list of books to purchase. (available for live demo on my portfolio).
